

ENGENIUS Limited

ENVIRONMENTAL POLICY

The principal business of Engenius Limited is the design and supply of equipment and systems for, and in providing advice in, the reduction of our clients' environmental impact.

In order that our offerings be considered seriously it is an unavoidable part of our ethos and practice at all times to be aware of the impact of our own activities in pursuing our business.

We act as though our actions, whether internal or external, are in the continuous view of our customers, suppliers, associates and agencies. This is achieved not through written policy but through appreciation of the effects of our actions, informed by the technical competence of all our staff.

Laurence Tennant
Director
Engenius Limited
